

# INUIT PEOPLE AND THEIR LAND

## Cultural trip to Greenland with an anthropologist in the Arctic spring

Accompanied by [Francesc Bailon](#), an anthropologist specialized in Inuit culture, we will approach one of the most unique and fascinating peoples of the planet. During our trip we will live with the Inuit which means "human beings" and we will know some of the most important aspects of their culture, not to mention their land, wild and untouched, and which they call Kalaallit Nunaat. Accommodation in Inuit local houses, archaeological sites, visit the place where Inuit women committed suicide, travel by dogsled, the largest icebergs in the northern hemisphere, and so on.

---

The harmony that has the Inuit people between tradition and modernity, without changing the medium in which they live and survive, is one example that, currently and with environmental problems that we experience, can make us reflect on the possibilities still offered by nature to man.
