

ICELAND: THE ISLAND OF ICE AND FIRE

The place on Earth most similar to the Moon

When Neil Armstrong, the first man who set foot on the Moon, left the Eagle lunar module, the landscape appeared before his eyes had have been familiar. Not in vain the crew of the Apollo XI spacecraft were training in Iceland for his uncanny resemblance to the lunar surface. And feet on earth, when you get to Iceland, you realize that there is no place on earth where the powerful forces of nature are more present than here: volcanoes, geysers, lava deserts, waterfalls, glaciers, hot springs, craters and cliffs cohabit with surprising harmony.

In the hand of a polar explorer with a spectacular sports career in the cold regions of the planet we will cross part of this amazing island locate in mid-Atlantic ocean. In Iceland, even the most seasoned traveler will not cease to be amazed at every turn. Swimming in a geothermal lake, being in the great Atlantic fault that separates Europe from America, being closer to Gullfoss an impressive double waterfall, seeing a lagoon inundated of icebergs where was filmed a spectacular sequence of 007 agent film or feeling the force of a geyser in the country that gave name to all geysers in the world, no doubt that will leave their mark on the visitor.

Besides admiring the nature, Iceland, also invites to do many activities that make you feel its incomparable nature even closer, like sailing in an amphibious vehicle among the ice floes, visiting beaches like you have never imagined, as that one in which the Clint Eastwood's film "Flags of our fathers" was shot, or relaxing in tranquil hot springs where we will forget that there is another world outside its borders.

And the magic of the country also does not breathe at night when the sky is covered with Northern Lights. The scientists consider the most impressive light phenomom of nature. So when one watches them, one wonders if it was one of these "Northern Lights" which prompted Leifur Eiriksson to reach the shores of America 500 years before Columbus...

TRAVEL PROGRAM

Day 1

- Flight to Reykjavik (Keflavik airport).
- Transfer by private car to Reykjavik.
- Accommodation in hostel/hotel in Reykjavik.
